

Kids are fascinated with the Human Body & in this collection we have included books to support topics covered in KS1, KS2 and KS3. There are non-fiction books on anatomy and body image plus practical guides on childhood, adolescence, diet and health.

The Growing Story

Author: Ruth Krauss **Format:** Paperback **Release Date:** 29/07/2021
Year Groups: Early Years, Key Stage 1

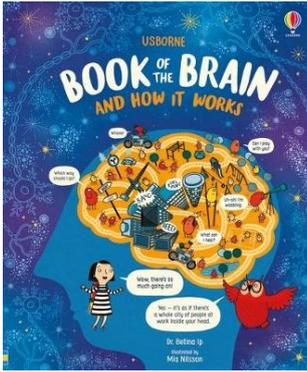

This charming story will enchant younger readers and is perfect for sharing aloud. Beautifully presented as an illustrated paperback, it is the perfect book for all little children wondering if they're growing too.

Kay's Anatomy

Author: Adam Kay **Format:** Paperback **Release Date:** 27/05/2021

A Complete (and Completely Disgusting) Guide to the Human Body This is an information text that will be read with great pleasure and is actually as unputdownable as a novel. It is very apparent that the multimillion-copy selling author and medical doctor has never grown out of his gleeful fascination with the human machine and has a real knack for presenting complex facts both clearly and concisely while making the reader laugh out loud. Similarly, the illustrations by Henry Parker combine accurate explanatory diagrams and zany amusing cartoons, often on the same page. Much of the humour is, of course, derived from the more disgusting aspects of the internal and external body and to making fun of the complicated language and terminology doctors and scientists use, but nonetheless using and explaining all those terms. Indeed the book concludes with a brilliantly educative glossary (and even the jokes are indexed!) A running gag is Clive and the 'naming committee' responsible for naming body parts, as is the continued references to the author's dog Pippin, but always in a way which enhances an explanation or a description and develops understanding. Chapters cover all the organs and systems of the body as well as reproduction, life and death and germs (including COVID-19) and include Kay's Kwestions (another running gag about needing a replacement Q on his keyboard) and True or Poo sections which answer the sort of questions inquisitive children will be dying to ask and expose the myths, misinformation and old wives tales that you might have heard. He does not shrink from difficult topics or giving unpopular advice - junk food, smoking and drinking really are bad for you and washing your hands properly is important.

Usborne Book of the Brain and How it Works

Author: Betina Ip **Format:** Hardback **Release Date:** 04/03/2021 **Year Groups:** Key Stage 1

March 2021 Non-Fiction Book of the Month The Usborne Book of the Brain (and How it Works) by neuroscientist Betina Ip is a delightful science book aimed at children aged 5+. It takes young readers on a journey inside the human head to see how the brain works and what it does, looking at the main brain cells (neurons) and their connections. It uses simple terms to explain how we see, think, use our senses, feel emotions, form memories, sleep and make decisions. Using age-appropriate practical examples, such as 'How do we decide which ice cream to have?', the book gives young children plenty to talk about with their family, friends and teachers. There are also sections on how to look after your brain and how scientists learn about brains. With its colourful illustrations and packed full of fascinating facts, this book is perfect – and great fun – for inquisitive children (and their parents).

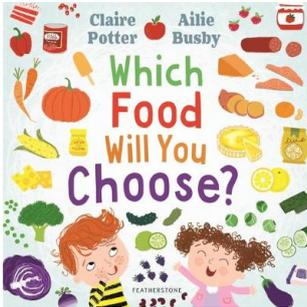

What's the T?

Author: Juno Dawson **Format:** Paperback **Release Date:** 18/02/2021 **Year Groups:** Key Stage 4

The no-nonsense guide to being trans and/or non-binary for teens What's the T? is street talk for 'tell me the truth' and this is exactly what Juno Dawson sets out to do. This Book is Gay by the same author became a staple purchase for school libraries and this new title absolutely deserves the same treatment and indeed should be purchased for the staff shelf too. This reader is paranoid about the correct language and terminology and I feel far more confident in my understanding now. The excellent glossary is worth the purchase price alone. Although it sets out to answer all the possible questions that anyone feeling body dysmorphia or anybody supporting a friend or family member with similar anxieties, could come up with, my strongest impression was one of moral rectitude. Without being strident or patronising and in her warm, witty and friendly way, the author makes very clear the right of every human being to define themselves and to be able to live their lives without fear. Many misconceptions (often generated by ill-informed or blatantly hateful messages in mainstream and social media) are firmly laid to rest. Notably what is and is not actually possible in terms of treatment for young people under 18. The information and advice given does not sugar coat anything. Nobody could be left in any doubt of the difficulties and the time that it would take to make any sort of transition, nor that there is one simple answer or one simple journey. The fascinating look at the history of transgender in different cultures and the witness statements from trans and non-binary people across the globe, give those of us in our cisgender privilege a salutary wake-up call, which is why this book has value for any sociology, politics or philosophy students too. An essential purchase for secondary schools and a recommended addition to any young

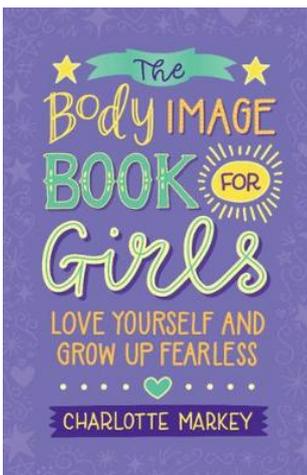

person's bookshelf. For more books visit our LGBTQI Literature Collection.

Which Food Will You Choose?

Author: Claire Potter **Format:** Paperback **Release Date:** 07/01/2021
Year Groups: Early Years, Key Stage 1

March 2021 Book of the Month Calling all parents facing food-related meltdowns! After introducing your food-fussy progeny to this instructive interactive picture book, you'll never need to make a meal of meal-time again. Recommended by paediatric dieticians, it introduces children to a rainbow of delicious food through a fun family-oriented story. What's more, the story can be lived off-the-page during real-life trips to the supermarket, helping to convince hard-to-please kids to try new foods and, as a result, it's also certain to please parents frazzled by food-related friction. The story begins with Mummy despairing of the food in the cupboard. "She couldn't find anything she wanted to make for dinner... I'm so bored of beige!" she grumbles. So, after deciding that "what we need is some colour!" Mummy heads to the supermarket, where she challenges her two toddlers to pick three kinds of food, the only proviso being that they must be red. Then follows a delightfully illustrated page of ravishing red foods that invites readers to decide what they'd choose. Each day they return to the shop, where the kids are issued with a fresh challenge - pick three yellow foods, three green, three orange, three purple. By the time Saturday comes around and the kids find Mummy eating a boring beige croissant, they make her a special colourful breakfast.

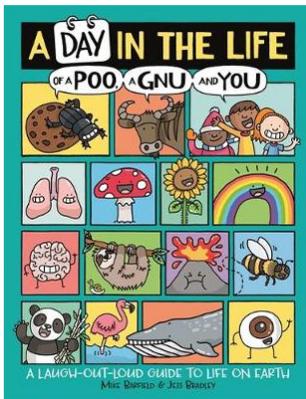

The Body Image Book for Girls

Author: Charlotte Markey **Format:** Paperback **Release Date:** 30/09/2020
Year Groups: Key Stage 2, Key Stage 3, Key Stage 4

Love Yourself and Grow Up Fearless The Body Image Book for Girls, published by Cambridge University Press, is certainly worth a place in any school library. Authored by a Professor in Psychology, whose research specialises in body image issues, the reader can have every confidence that the contents are backed up by authoritative evidence, but this is no dry academic tome. As she states in her introduction, Dr Markey is a mother of teenagers, a boy and a girl, and she really cares about girls having the information they need to make the right decisions and to develop healthy habits. When young girls are bombarded with images of airbrushed celebrities and social media pressures it is no wonder that most girls are dissatisfied with some aspect of their bodies and this can lead to anxiety, depression and worse. With an estimated 1.25 million people in the UK having an eating disorder there can be no doubt that there is a real need for a book like this to counter the misinformation out there. The ten chapters cover very clearly and concisely an enormous amount of information ranging from puberty and

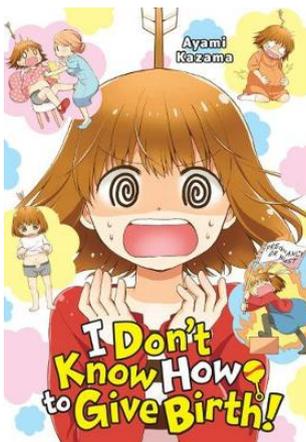

body changes to self-care, mental health, basic nutritional science, healthy eating habits and making food fun, physical activity and loving our bodies for what they do (not how they look) and how to handle social media and challenging fat shaming language. Each chapter has My Story sections with real life experiences, myth busting boxes, Q&A and a valuable concluding summary of the key points. Combined with an excellent glossary and helpful illustrations the reader can quickly find the information that they need at any given time. But the unpatronizing and non-didactic tone also makes this an enjoyable and engaging read likely to be read from cover to cover. Highly recommended for age nine upwards to the many adults who would benefit from its wisdom too! For more books with a strong, feminist theme, visit our Girl Power feature.

A Day in the Life of a Poo, a Gnu and You

Author: Mike Barfield **Format:** Paperback **Release Date:** 03/09/2020
Year Groups: Key Stage 1, Key Stage 2

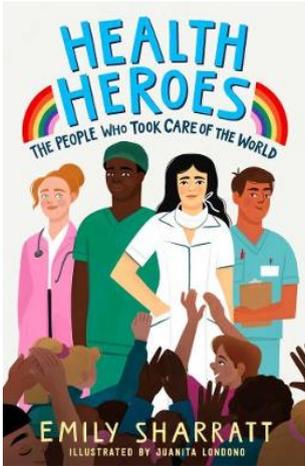

Winner of the Blue Peter Book Awards 2021, Best Book with Facts A Day in the Life of a Poo, a Gnu and You is packed with facts, laughs and amazing illustrations you can dive into all day long. Meet your grumpy liver that has to do practically EVERYTHING; your trusty hands that are very, well, handy; the spiky porcupines ready to charge; lonely Mars rovers abandoned on the Red Planet; raging tornadoes ready to rip through the pages of the book and bubbly volcanoes ready to blow. All entries are told in the fun, friendly and informative style of Mike Barfield, and are brought to life by the colour-explosion of Jess Bradley's awesome illustrations.

I Don't Know How to Give Birth!

Author: Ayami Kazama **Format:** Paperback **Release Date:** 11/08/2020
Year Groups: Key Stage 4

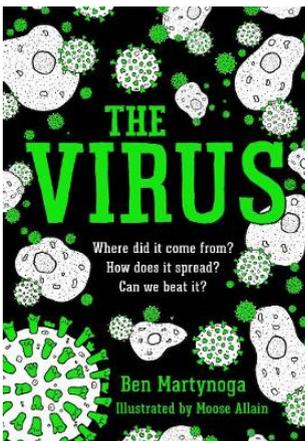

Shortlisted for the Excelsior Award Black 16+ KS5 A humorous and heartfelt autobiographical comic essay of a manga artist new to the challenges of motherhood! Follow her journey as she learns the ins and outs of pregnancy and childbirth - and the impossibility of finding comfy maternity underwear!

Health Heroes

Author: Emily Sharratt **Format:** Paperback **Release Date:** 06/08/2020

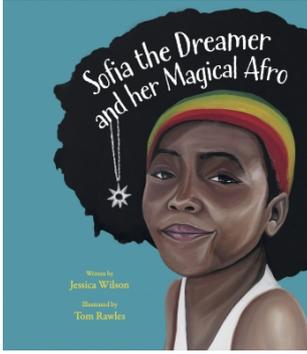

The People Who Took Care of the World Every one of us has visited a doctor or nurse, or taken a trip to hospital at some point in our lives, but it took Coronavirus to make us really notice the men and women who look after us when we need it, and to recognise them as heroes. This inspiring and informative book begins with introductions to the very first doctors, nurses and surgeons (starting with Hippocrates), then comes totally up to date. Real, live 'health heroes' working in a range of different locations and roles tell us about their working lives, what they do and why they love it. It's stirring stuff, many of the anecdotes and stories they share are really moving and all are fascinating. This is an excellent book for anyone interested in a career in medicine or care, but a great read too for all who've watched, wondered at and applauded the people who have done so much for us during these difficult times.

The Virus

Author: Ben Martynoga **Format:** Paperback **Release Date:** 30/07/2020 **Year Groups:** Key Stage 2, Key Stage 3, Key Stage 4

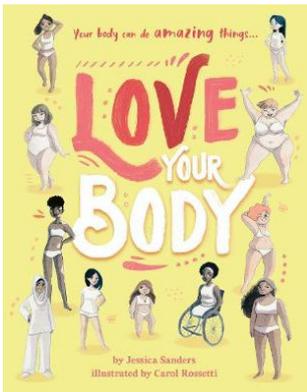

September 2020 Book of the Month Less than one year ago, until November 2019 in fact, SARS-CoV-2 coronavirus hadn't infected a single person and was completely unknown to nearly all of us. Now it has changed our whole world, yet most of us still have only a hazy idea of what viruses are, which is where this brilliant little book comes in. The Virus tells you everything there is to know about viruses including of course COVID-19. It explains what viruses are, what they look like and do, why they are so successful at making us ill, what we can do to combat them, and why some of them actually help us. If this sounds a bit technical or heavy going, think again: it's fascinating stuff and presented in a way that makes it really easy to read and understand. The story of coronavirus as told here is an adventure, full of heroes and villains, facts and figures that will stop you in your tracks, and some good jokes too. I can't think of a more interesting or relevant book for our times - everyone needs to read this! If you're interested in science you can find many similar titles in our Best Non-Fiction collection.

Sofia the Dreamer and her Magical Afro

Author: Jessica Wilson **Format:** Paperback **Release Date:** 01/06/2020
Year Groups: Key Stage 1, Key Stage 2

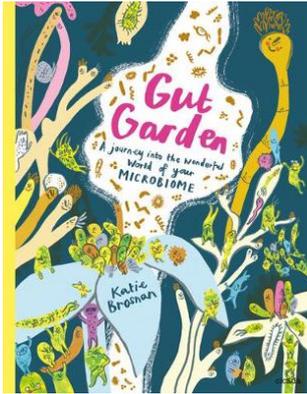

This is a poetic look at the history of natural hairstyles – and, through Sofia, we see children encouraged not to be afraid to be themselves. Every Sunday Sofia dreams as her Mum washes and styles her hair – and every style has a period and a cultural figure as an example of how styles and history sit together. Whilst feeling sleepy as her hair is done Sofia dream-travels to visit a Jamaican Rastafarian, an African ancestor and a Black Panther in Los Angeles. The poem takes on this journey through history and also beyond our world to the realisation that love of one another is the basis of all. The illustrations are bold and the fact that Tom Rawles is best known for album cover shows through his bold contemporary style. The publisher is a British Jamaican independent company – set up to bring to light some of the stories from the Caribbean and its peoples. It was founded in response to the need for diversity in publishing. I hope we see more from these publishers!

Love Your Body

Author: Jessica Sanders **Format:** Hardback **Release Date:** 03/03/2020
Year Groups: Key Stage 2

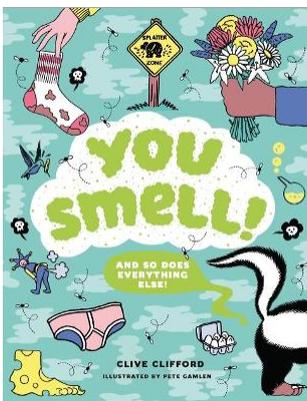

March 2020 Book of the Month ‘My body is strong. My body can do amazing things. My body is my own.’ That’s the message for young girls to take from this comforting, uplifting and much-needed self-help guide. Our bodies are unique and amazing, it says, all of them, and there’s no one size, shape or colour that’s perfect. The message is demonstrated via colour illustrations featuring a range of young women happy with the way they look and who they are. The accompanying text reinforces this and also provides self-help tips for those times when you’re feeling down or insecure. There’s a really useful ‘Now What?’ section too full of self-care practices, while the jacket doubles as a poster for your wall, a self-care list for everyday life. It’s been carefully thought out from beginning to end, while illustrator Carol Rossetti’s young women feel like a group of friends cheering you on. “When girls are worried about how their bodies look, 8 out of 10 of them will opt out of important life lessons such as engaging with friends and loved ones. This is a feminist issue.” – Jessica Sanders You can find more books with a strong feminist message in our collection; Work It Girl - Inspiring and Informative Books on Feminism for All Ages

Gut Garden

Author: Katie Brosnan **Format:** Hardback **Release Date:** 24/10/2019
Year Groups: Key Stage 2

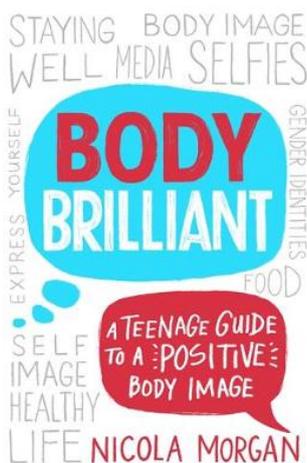

Longlisted for the UKLA Book Awards 2021 | Long-listed for the School Library Association Information Book Award. Through Katie Brosnan's personable illustrations, we follow the digestive process from the moment the food enters our mouths to the moment the waste leaves our bodies. Along the way we are introduced to a variety of microbes - good and bad - and gain an insight into the vast ecosystem that exists inside us.

You Smell!: (and so does everything else)

Author: Clive Gifford **Format:** Hardback **Release Date:** 07/10/2019
Year Groups: Key Stage 2

October 2019 Non-Fiction Book of the Month This book put smell, the Cinderella of the senses, into the spotlight. It examines smelly facts about the human body, some of them really rather disgusting, as well as the power and importance of our sense of smell. It looks at how animals use smell and how plants use it too to attract insects or keep animals away. And it looks at smells and smelling through history before taking a last look at weird and wonderful odours. With unusual facts and information on every page it's well worth a nose. I was particularly fascinated by the 'odorous occupations' highlighted in panels throughout the book and children will be definitely tempted to try out the smelly experiments and activities it suggests too.

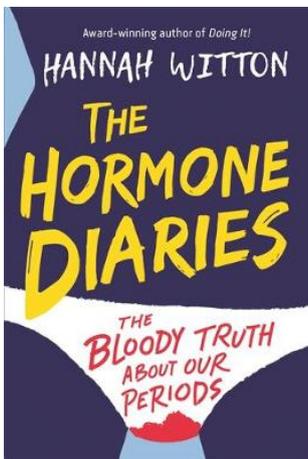

Body Brilliant A Teenage Guide to a Positive Body Image

Author: Nicola Morgan **Format:** Paperback **Release Date:** 11/07/2019
Year Groups: Key Stage 3, Key Stage 4

With the award winning success of previous titles such as Blame My Brain, The Teenage Guides to Stress, Friends, and Life Online and Positively Teenage, Nicola Morgan has well established credentials with teachers, parents, librarians and young people for calm, authoritative, well researched guidance and this new title may be her most important yet. We live in the age of the image and young people are constantly exposed both to images of perfection and to critical responses to their own images. Anybody of any age can suffer from negative body image and Nicola admits that writing this book helped her, just as reading it will help many adults I am sure. But adolescence is when humans are most vulnerable and exposed to a "perfect storm" of changes to bodies, feelings, environment and expectations and so they are the ones that

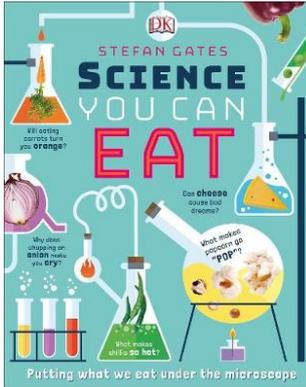

need this guidance most. Nicola has also produced some extensive teaching notes to accompany the book on her website www.nicolamorgan.com. The book is divided into two sections: All in the Mind and Making Your Body Brilliant. Body image is created by your mind and the first section explains how this works, how negative patterns can develop and tackles topics like gender, sexuality, body dysmorphic disorder, social media and cultural differences. Every chapter includes Body Boost suggestions- techniques to help you think more positively as well as a fantastic summary and lists of resources to find out more and including fiction reading suggestions (Nicola is a tremendous advocate for what she terms Readaxation) The next section is full of practical ways to keep your brilliant body healthy, strong and looking its best to enable you to achieve your dreams. Full of quotes and engaging human stories and told in a completely non-patronising manner, this is an essential purchase for classrooms and school libraries.

The Hormone Diaries The Bloody Truth About Our Periods

Author: Hannah Witton **Format:** Paperback **Release Date:** 13/06/2019 **Year Groups:** Key Stage 3, Key Stage 4

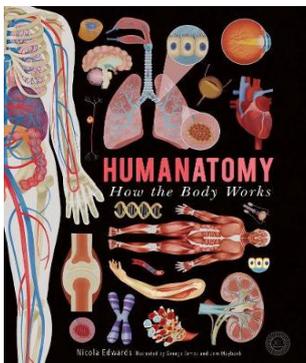

When it comes to periods, we're often expected to cope with it quietly. But our periods and our hormones affect every area of our lives - so I am done with scuttling to the toilet with a tampon up my sleeve. I vlog about periods and hormonal contraception, and it's clear that I'm not the only one aching to be more open about this. When I reached out to my online community, I received an outpouring of raw, real and hilarious stories about what we through simply for having a uterus. From first periods to first coils, pimples to hot-water bottles and PCOS to endometriosis, The Hormone Diaries is your essential companion on the hormone rollercoaster. Filled with Hannah's insights, fascinating research and those priceless crowdsourced stories, it's the reassuring hug we all need. At least 50 per cent of the world has to deal with this stuff - it's time we started talking about it.

Science You Can Eat Putting what we Eat Under the Microscope

Author: Stefan Gates **Format:** Hardback **Release Date:** 04/06/2019
Year Groups: Key Stage 2

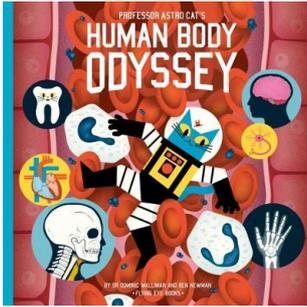

Discover the seriously impressive science that goes on every time you cook or eat. This children's book explores the science of food by asking questions you're hungry to know the answers to, and putting them to the test through fun experiments. Science You Can Eat will transform your kitchen into a lab through fun food experiments. Cooking is chemistry, and the fun science experiments - such as tricking your taste buds, making slime taste delicious, and investigating some of the strangest flavours around will prove it. This exciting kids book tackles all the tasty science questions you have about food, plus plenty more that you hadn't thought of! Once you understand science, you understand food, so find out why popcorn go pop as you test it out for yourself, explore how taste is affected by smell, then discover whether eating insects is the future of food. Examining interesting ingredients and exciting eating, as well as peeking into the future of food, Science You Can Eat helps you understand what's happening with our food and why. Each page is guaranteed to leave you hungry for more.

Humanatomy

Author: Nicola Edwards **Format:** Hardback **Release Date:** 03/05/2018
Year Groups: Key Stage 2

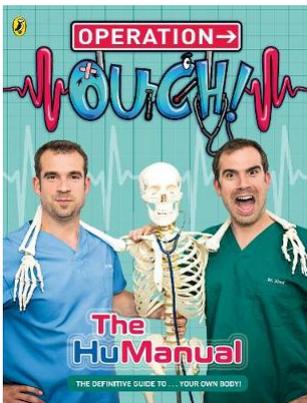

The human body is amazing, 'the most incredible machine on Earth' says this book, which explains exactly how it works, from the inside out. Over colourful, clearly designed pages, featuring detailed illustrations, it peels back the layers of the human body to examine the individual body systems, from the integumentary system (skin, hair and nails), through the muscular system, skeletal system, digestive system, right up to and including DNA, in a chapter What makes me who I am? Questions are asked throughout in fact, making it highly interactive and engaging, and some of them provoke the response, 'Yuk' (Is it true you can drink your own urine). With a neat reference guide to the body tucked inside the front cover, and useful glossary at the back, this book is well thought out and informative from beginning to end.

Professor Astro Cat's Human Body Odyssey

Author: Dominic Walliman **Format:** Hardback **Release Date:** 01/03/2018 **Year Groups:** Key Stage 1

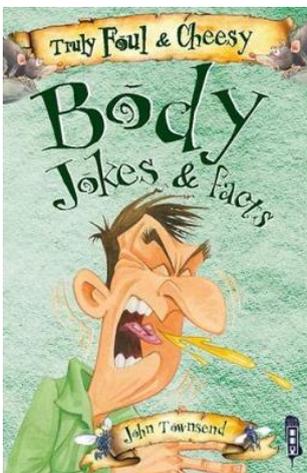

Shortlisted for the Blue Peter Book Awards 2019, Best Book with Facts | Everyone's favourite cat-astronaut investigates the human body in this beautiful, graphically illustrated look at everything from eyes to muscles, genetics to reproduction and the immune, endocrine and lymphatic systems.

Operation Ouch!: The HuManual

Author: Puffin **Format:** Hardback **Release Date:** 27/07/2017 **Year Groups:** Key Stage 2

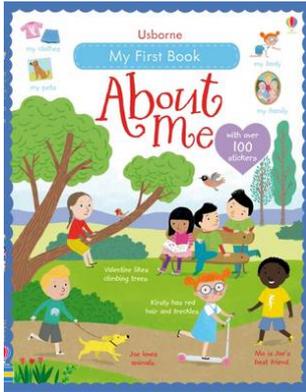

August 2017 Book of the Month Take a tour of one of the most complex, diverse and downright unusual places on the entire planet - the human body! Find out all about what makes YOU tick, from the wonders of the human brain to the tingling in your ticklish toes.

Truly Foul & Cheesy Body Jokes and Facts Book

Author: John Townsend **Format:** Paperback **Release Date:** 27/04/2017 **Year Groups:** Key Stage 1

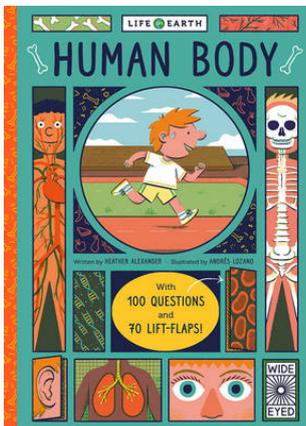

The introduction to this book contains a warning: reading it might make you LOL, but it could also make you GOL (groan out loud), or even SEL (scream even louder). It certainly does contain some gut-churning information about the human body, everything from why our feet smell to how many mites are living in our eyelashes (yuk), but in fact it's the jokes and limericks that pop up at regular intervals that might really get readers groaning! Nonetheless it's a clever and appealing way to dole out information about our bodies, warts and all, and children will be fascinated by what they learn.

My First Book About Me

Author: Felicity Brooks **Format:** Paperback **Release Date:** 01/04/2017 **Year Groups:** Early Years

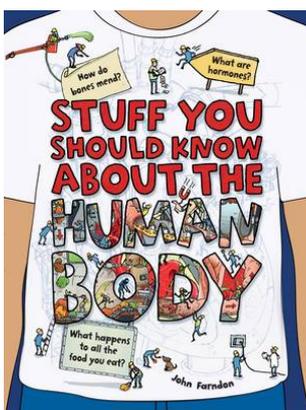

Bright, attractive pages and friendly text scattered with questions and invitations make this book a great way to start children thinking about who they are and how they fit into our world. One double page spread follows Anisha throughout her day, from getting up to school, playtime and home life, concluding, 'Can you draw some pictures of your day?'; there are pages on feelings, on clothes and food - what's good to eat and why; and a page to show how what we can do changes as we grow up. Children are encouraged to complete scenes with colourful stickers of both words and images. An excellent and inclusive first book. ~ Andrea Reece

Life on Earth: Human Body

Author: Heather Alexander **Format:** Board book **Release Date:** 02/03/2017 **Year Groups:** Key Stage 1

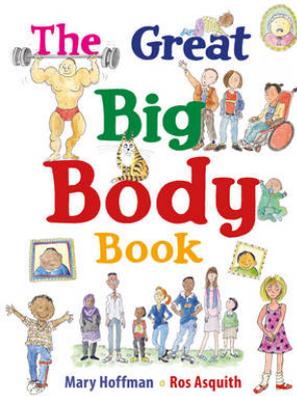

This is a typically informative and cleverly designed book from Wide Eyed Editions, one of our leading new publishers of non-fiction. Over 16 spreads, it asks 100 questions about the human body, from what are my bones made of, to why do I have a spleen, to what does my brain look like. The answers are often hidden behind flaps - there are 70 of these - for example you can open up the heart to examine what's on the inside, and peep inside the eye. The flaps make this a fun, interactive reading experience as well as an informative one. ~ Andrea Reece

Stuff You Should Know About the Human Body

Author: John Farndon **Format:** Paperback **Release Date:** 23/02/2017 **Year Groups:** Key Stage 2

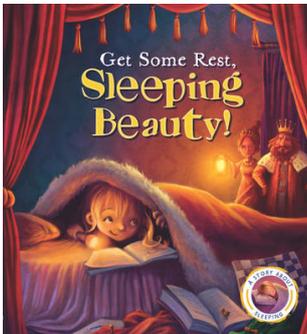

Take a tour round the inside of the human body in this unusual and quite excellent information book. It examines our component parts, from cells to blood, bones, liver, lungs and the brain, explaining how they function - and thereby how we function - though colourful, intricate cross-section diagrams, each one full of busy little people demonstrating the myriad different actions involved. In this way complex processes are broken down into comprehensible steps. Short passages of text illuminate things further. You can't help but be drawn in by the look of the pages and this is an absolutely fascinating and thoroughly effective introduction to the workings of the human body. ~ Andrea Reece

The Great Big Body Book

Author: Mary Hoffman **Format:** Hardback **Release Date:** 04/08/2016
Year Groups: Key Stage 1

This author and illustrator team are superb at informing children about really important things clearly and sensitively, without ever talking down to their audience. They've already looked at families, feelings and the environment, here they look at the human body, inside (what's under the skin, how our brains work) and out (what changes the body undergoes as we grow up and grow old, what makes us the way we are). It's full of information presented in an appealing and accessible way, and with lots of humour – verbal and visual. A book that will answer children's questions, and that will make them understand and feel reassured about the world and their place in it too. ~ Andrea Reece

Fairytales Gone Wrong: Get Some Rest, Sleeping Beauty!

Author: Steve Smallman **Format:** Paperback **Release Date:** 20/05/2016
Year Groups: Key Stage 1

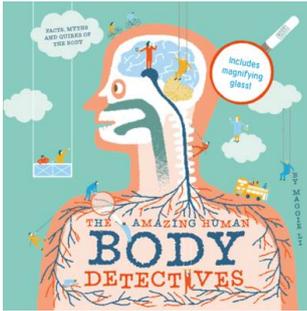

Young children will learn the importance of rest in this hilarious story all about sleep and as result bedtime should become an easier time of the day! Get Some Rest, Sleeping Beauty is one title from the Fairytales Gone Wrong series and is a welcome addition for parents looking for picture books with a message.

Fairytales Gone Wrong: Don't Pick Your Nose, Pinocchio!

Author: Steve Smallman **Format:** Paperback **Release Date:** 20/05/2016
Year Groups: Key Stage 1

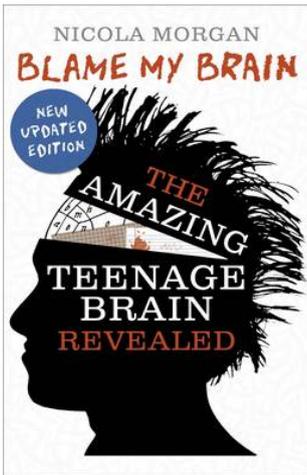

There are two big lessons to be learned in this new take on the favourite fairy tale: don't tell lies – we all know what happens to Pinocchio when he tells an untruth – and don't pick your nose! The fairy who brings Pinocchio to life warns him against both these things, but he can't resist rummaging around in his nose for bogies, and then denying it when accused! At last Jiminy Cricket arrives and with his help, Pinocchio mends his ways. Part of a picture book series that teaches children about hygiene, this certainly gets its message across and in a fun but effective way. ~ Andrea Reece

The Amazing Human Body Detectives Amazing Facts, Myths and Quirks of the Human Body

Author: Maggie Li **Format:** Hardback **Release Date:** 11/06/2015
Year Groups: Key Stage 2

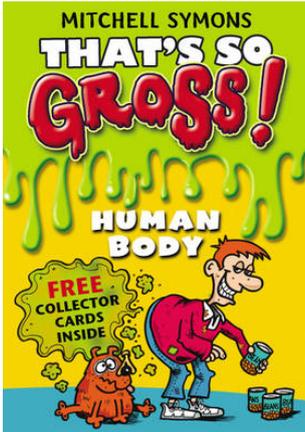

June 2015 Fascinating Facts Book of the Month This fact-packed guide to the human body will encourage children to think more about how their body works. It starts with a maze, a good way of demonstrating that the book is about finding things out yourself. Sure enough, in bright, busy spreads, each one dedicated to a different part of the body – muscles, brain, organs etc. – as well as diagrams and information boxes there are questions for the reader and experiments to try out. The book comes with a little magnifying glass too, a fun way of encouraging study of the diagrams, while an activity page at the back suggests that the reader use it on themselves for a real close up on the amazing body.

Blame My Brain: The Amazing Teenage Brain Revealed

Author: Nicola Morgan **Format:** Paperback **Release Date:** 02/05/2013
Year Groups: Key Stage 3, Key Stage 4

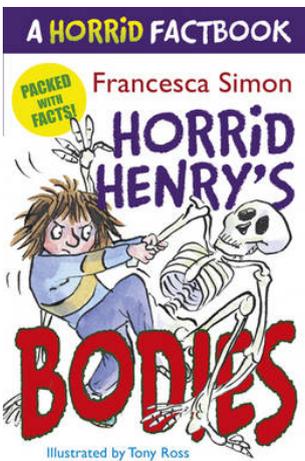

Teenagers and their parents will find much to fascinate them in this updated edition of Nicola Morgan's skilful, non-scientists explanation of the complex and specific science that makes teenagehood such a specific period of growing up. New research has revealed even more about the workings of the brain and it appears that teenagers are wired somewhat differently. That's especially true when it comes to sleep – as all parents of teens know well! It is also true in regard to the taking of risks and to the taking of stimulants. Tests and quizzes and lots of illustrations support the scientific but jargon free text.

That's So Gross!: Human Body

Author: Mitchell Symons **Format:** Paperback **Release Date:** 31/03/2011 **Year Groups:** Key Stage 2

Loads of facts about every part of the body are crammed into this highly illustrated book. And many of them certainly are gross! No sensibilities are spared in this guide to the smells, sights, sounds and look of many different parts of the body. The science that underpins it is good making it a useful source of knowledge as well as fun to read. A great series to get kids into reading. Titles in the series include Human Body, History, Creepy Crawlies and Animals.

A Horrid Factbook: Horrid Henry's Bodies

Author: Francesca Simon **Format:** Paperback **Release Date:** 03/02/2011 **Year Groups:** Key Stage 1

A Lovereading4kids 'Great Read' you may have missed 2011 selection. Horrid Henry fans will delight in their favourite bad boy's book of disgusting facts. The way Horrid Henry looks at things, much about the body is pretty disgusting so, from ear wax through snoring to the highest jumping animal in the world, Horrid Henry gives his original take on the unusual and weird things about bodies. And for some extra Horrid Henry fun, you can download three nit-infested activity sheets free from Readers Guide on the right hand side of this page.
